Pamela Cantor, M.D. is a child and adolescent psychiatrist, author, and thought leader on human potential, the science of learning and development, and educational equity.

In the aftermath of the 9/11 attacks, she founded Turnaround for Children, which translates scientific insights into tools and services that help educators establish the conditions for all students to thrive. In two books published in 2021, Whole Child Development, Learning and Thriving: A Dynamic Systems Approach and The Science of Learning and Development, Dr. Cantor crystallizes key scientific concepts about how human potential and learning unfold so that anyone seeking to open pathways for learning and opportunity for young people can do so.

Dr. Cantor is a governing partner of the Science of Learning and Development Alliance, focused on elevating the science of learning and development as an actionable drive of equity in education. She received an M.D. from Cornell University, a B.A. from Sarah Lawrence and was a Visiting Scholar at the Harvard Graduate School of Education.
